

## SUBJECT : BRIA/BNIA contact in Metropolitan France

This AIC cancels and supersedes AIC A 03/17 and A 32/17

### 1. Introduction

This circular serves as a reminder of the way to contact a Regional or National Office for Flight Information and Assistance (BRIA/BNIA), and to list them in Metropolitan France.

The BRIA/BNIA are authorities that provide the aeronautical information needed to prepare flights and the procedure for following the messages related to flight plans and regulatory measures.

### 2. Single number +33 (0)1 56 301 301

A call to this single number (which replaces the number 0810 IFR VFR) costs the same as a standard call, and enables callers to contact the concerned authority: BRIA/BNIA or BTIV (flight information emission office) or DIRCAM (military air traffic directorate) answer machine, depending on the location (provided that the call is made in France), the time and the purpose of the call.

- Choice 1: filing or modification of a flight plan / aeronautical information      => BRIA/BNIA
- Choice 2: closure of flight plan (1)      => BTIV
- Choice 3: information about the RTBA (very low altitude network) activity      => DIRCAM

*(1) The implementation of this procedure does not affect the existing regulations about the closure of flight plans.*

*You are reminded that all flight plans must be closed in order to avoid serious disturbance to the running of the air traffic authorities and significant costs resulting from the conduct of unnecessary searches.*

*The aim of the number +33 (0)1 56 301 301 is to make it easier to close a flight plan on arrival, when this has not been possible using the frequency of the air traffic authority in question.*

### 3. List of BRIA/BNIA in Metropolitan France with effect from 11th December 2017. The BRIA in Nice is closing down from this date at 09h00 UTC and its activities will be resumed by the BNIA in Bordeaux.
