ASSOCIATED BUFFER ZONE for flight planning (FBZ – FPL BUFFER ZONE)

1. Context

A FBZ (FPL Buffer Zone) is associated with the ZIT in order to prevent the planning of flights over an extended period in relation to its planned period of activity, i.e. 60 minutes before the start of activation of the ZIT (buffer time of -60 minutes/+0 minutes). No geographical buffer is implemented by the FBZ, given the size of the ZIT.

2. IFR flight planning

- 15h30-16h00 : rejection by the IFPS of flight plans to LFPO, LFPG, LFPB, LFPN, LFPM, LFPT, LFPL, LFOB entering the FBZ
- 16h00-21h30 : rejection by the IFPS of all flight plans to, from or in transit through the FBZ
- 21h30-22h00 : rejection by the IFPS of all flight plans to, from or in transit through the FBZ, with the exception of flights departing from LFPG

These provisions do not apply to aircraft taking part in activities taking place in the zone.

Users are informed of FBZ activity by means of AUP/UUP information published in real time by Eurocontrol :
